SUMMARY

A Fullstack Developer with 3+ years of professional experience designing, developing, and maintaining scalable web applications, APIs, and backend systems. Experienced in building production-ready solutions using **React.js, Next.js, Node.js, Laravel, PHP, JavaScript, and TypeScript**, with a strong focus on clean architecture, performance, security, and maintainability. Skilled in RESTful API design, database modelling, authentication and authorisation, third-party integrations, background jobs, caching, and application optimisation. Proficient in **MySQL, PostgreSQL, Redis, Docker, Git, AWS, and modern development workflows**, with hands-on experience delivering SaaS platforms, enterprise applications, WordPress solutions, and custom web applications. Strong understanding of software engineering principles, data structures, algorithms, and backend architecture, with a proven ability to solve complex technical challenges, write clean and maintainable code, and deliver reliable, scalable systems in collaborative development environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), PHP, TypeScript, HTML5, CSS3, SQL, Python, Java

Backend: Node.js, Express.js, Laravel, RESTful APIs, Authentication & Authorisation, API Integrations, Background Jobs, Caching

Frontend: React.js, Inertia.js, Tailwind CSS, Bootstrap, WordPress (Bricks Builder, Elementor), Responsive Web Design

Databases: MySQL, NoSQL, PostgreSQL, Redis

Cloud & DevOps: AWS, Docker, Git, GitHub, CI/CD, Linux

CMS & Automation: GoHighLevel Integrations, n8n automation, framer, WordPress, Custom Theme Development, Plugin Development, Webhooks, Workflow Automation

Software Engineering: Database Design, System Architecture, Data Structures & Algorithms, Performance Optimisation, Secure Application Development, Debugging, Clean Code, Agile/Scrum

EXPERIENCE

Lead Full-Stack Developer @ Nodd Solutions

11/2024 – 04/2026 | Sydney, Australia (Remote)

- Built and optimised 10+ backend-driven landing page systems integrated with GoHighLevel, enabling automated lead capture, CRM workflows, marketing pipelines, and improved user engagement through efficient server-side logic and API integrations.
- Developed and led Nodd-Ticket, a full-stack task and ticket management system integrated with business automation workflows, improving internal operations, team collaboration, and workflow efficiency by 30%+.
- Designed and implemented GoHighLevel automation solutions, including CRM integrations, lead management workflows, booking systems, and automated follow-up processes, reducing manual operational tasks and improving business efficiency.
- Collaborated with designers, marketers, and cross-functional teams to build conversion-focused websites and funnels while connecting frontend experiences with GoHighLevel backend automation and customer relationship workflows.
- Led and mentored a team of developers, establishing coding standards, conducting reviews, and providing architectural guidance to improve delivery consistency and maintainable integrations.

ERP Development @ Teter Trading

05/2025 – 09/2025 | Addis Ababa

- Collaborated with a team of 3 backend developers on an ERP system, contributing to full-stack development.
- Designed and implemented a modular architecture for the JavaScript and view modules, improving maintainability and scalability.
- Developed and integrated new organizational division features, including fully functional user interfaces.

Laravel Mentorship @ GDSC AASTU

11/2023 – 05/2024 | Addis Ababa

- Led the only Laravel team in the study sessions of Google Students Developers Club
- Reassembled a disbanded group of five Laravel trainees.
- Landed a fourth position in a Hackathon.

Front-End Engineer @ Pulto Technologies

05/2021 – 11/2023 | Addis Ababa

- Designed and developed a frontend subsystem concept seamlessly integrated into an existing operational platform, extending functionality while maintaining consistent user experience and core workflows.
- Led frontend development initiatives, successfully delivering 5+ production websites and web applications with responsive, user-focused interfaces, strong performance, and reliable cross-device experiences.

EDUCATION

Bachelor of Science in Software Engineering, Addis Ababa Science and Technology University

National Exit score: 80%

SELECTED PROJECTS

Nodd Ticket

- A comprehensive ticket and task management platform designed to replace ClickUp for internal company operations
- Provides a flexible folder and subfolder structure with personal calendars and streamlined task assignment
- Includes multiple productivity views: list, kanban, and calendar formats
- Integrates with Gmail and supports interactive documents with scheduling tools

Space Invaders

- Built an arcade-style space shooter from scratch using pure JavaScript with no game engine or external libraries.
- Implemented real-time gameplay systems including collision detection, physics, game loops, and entity management.
- Applied advanced JavaScript concepts such as data structures, algorithms, memory management, and performance optimisation.
